Full-stack engineer with 4+ years building web applications across ERP platforms, invoicing and tax systems, analytics tools, e-commerce, live video streaming and industrial software. Angular and TypeScript on the front end; Python, FastAPI, Node.js, NestJS and .NET on the back end, with PostgreSQL underneath, and deployment and operations handled directly — Docker, Kubernetes, Grafana, Keycloak.

Currently building LLM-powered features on top of business applications — document extraction with FastAPI, retrieval-augmented search using pgvector, and agentic tool-calling assistants over relational data.

TECHNICAL SKILLS

- **AI / LLM** OpenAI & Anthropic APIs, LangChain, RAG, embeddings, pgvector, tool calling, structured extraction, Pydantic
- **Frontend** Angular, TypeScript, React.js, Vue.js, HTML/CSS, design systems
- **Backend** Python, FastAPI, Node.js, NestJS, .NET
- **Databases** PostgreSQL, PL/pgSQL, MySQL, MongoDB, Redis, Supabase
- **DevOps & Tools** Docker, Kubernetes, Jenkins, CI/CD, Git (GitHub/GitLab), Linux, Nginx, Traefik, Grafana, AWS S3
- **Security & Auth** Keycloak, JWT, OAuth2
- **Architecture** REST APIs, microservices, clean architecture, Agile/Scrum, UML
- **Languages** Arabic (native), English (advanced), French (advanced)

PROFESSIONAL EXPERIENCE

Full-Stack Engineer (AI) — Freelance

Jan 2026 – Present

Monastir, Tunisia | Remote

LLM-powered services and agentic workflows — Python back-ends with web front-ends.

- **Invoice extraction API** — FastAPI service parsing PDF invoices into structured data via LLM extraction with Pydantic validation, covering **[how many supplier layouts / invoice formats?]** and validated against a **[N]**-document test set.
- **RAG over business documents** — chunking, embeddings and semantic retrieval on PostgreSQL/pgvector, with source citations, delivering answers in **[N]** seconds over a **[N]**-document corpus.
- **Agentic assistant** — answers natural-language questions over relational data via tool calling across **[N]** registered tools.
- Angular front-ends over Python services, containerised with Docker.
- **Code samples** — github.com/anouar10 · **[link 2 repos here: the RAG service and the agentic assistant]**

Stack: Python, FastAPI, Pydantic, OpenAI/Anthropic APIs, LangChain, PostgreSQL/pgvector, Angular, TypeScript, Docker.

Senior Frontend Developer — INAZ SRL

Jul 2024 – Present

Monastir, Tunisia | Remote

- Build and maintain **[N]** application modules of INAZ's ERP platform for the Italian market in Angular and TypeScript, within a **[N]**-developer team.
- Work within the company's internal component library and design system, extending shared components — contributed **[N]** reusable components back to the library.
- Implement data-heavy interfaces — forms, tables and reporting views — over REST APIs.

Stack: Angular, TypeScript, REST APIs, design system / component library.

Frontend Developer — Sastec

Feb 2024 – Jun 2024

Sousse, Tunisia | Full-time (fixed-term contract) **[keep only if accurate]**

Worked on a live streaming and video content platform used to broadcast live events and publish on-demand video for international organisations, including UNESCO. Developed front-end features in Vue.js, React and AngularJS.

Stack: Vue.js, React.js, AngularJS, CSS.

Full-Stack Engineer — BIGUP-CONSEILS

Oct 2023 – Jan 2024

Sousse, Tunisia | Full-time (fixed-term contract) **[keep only if accurate]**

Built an HR web application for employee attendance and leave management: check-in/check-out tracking, holiday request and approval workflow with automatic leave balances, and role-based access for employees, managers and HR — delivered end to end in **[N]** months as sole developer **[adjust if you were not solo]**.

Stack: Angular, NestJS, AWS S3, Git.

Full-Stack Engineer — Activ Soft SARL • Freelance

Jun 2022 – Dec 2025

Monastir, Tunisia | Remote | Part-time, concurrent with the full-time roles above

- Built **[N]** e-commerce platforms — product catalogues, cart and checkout flows, order management and admin back-offices.
- Developed front-ends in Angular and React, and back-end APIs in .NET and Node.js.
- Handled deployment with Docker.

Stack: Angular, React, .NET, Node.js, Docker.

Full-Stack Engineer — Business Process Solutions (BPS)

Jun 2022 – Oct 2023

Monastir, Tunisia | Hybrid

Full-stack engineer across several business applications: an invoicing platform (Angular + Node.js REST API), a withholding tax application, and a survey & statistics platform. Designed PostgreSQL schemas and wrote PL/pgSQL functions. DevOps: Docker, Kubernetes, Grafana, Keycloak.

Stack: Angular, React, TypeScript, Node.js, PostgreSQL, PL/pgSQL, Docker, Kubernetes, Grafana, Keycloak, Firebase, Git.

Full-Stack Engineer — BPS • Internship

Jan 2022 – Jun 2022

Monastir, Tunisia | Hybrid

Developed a parking management web application: real-time occupancy views, vehicle entry/exit records, Node.js REST API and MongoDB data model with automatic fee calculation and role-based access.

Stack: Angular, Node.js, MongoDB.

PHP Developer — Tounes Connect • Internship

Jun 2020 – Sep 2020

Monastir, Tunisia | Hybrid

Client-coach booking platform: profiles, search, session booking with email confirmation, admin back-office. **Stack:** PHP, MySQL.

PHP Developer — L'EPI D'OR • Internship

May 2018 – Aug 2018

Monastir, Tunisia | Hybrid

Weighbridge application for truck weighing: gross/tare/net calculation and weighing-ticket history per vehicle and supplier. **Stack:** PHP, MySQL.

EDUCATION

Computer Engineering, Private Engineering School (EPI)

Sep 2019 – Jun 2022

Sousse, Tunisia

Software development, systems design and networking, with practical work in Java, Python and Django and exposure to AI concepts. Foundations in Agile/Scrum, UML and Merise analysis.

Applied Degree in Management Information Technology

Sep 2016 – Aug 2018

Sousse Higher Institute of Management, Sousse, Tunisia

Information systems, software development and system analysis, with practical work in C++, Java and Java EE (Servlets).
